The Rudiments of Vocal Music, in a concise manner, and a number of Original Airs, suitable for Divine Worship.

By JAMES NEWHALL, Philo Mufico.

Copy-Right Secured According to Act of Congress.

PRINTED, (Typographically,) AT NORTHAMPTON,

By ANDREW WRICHT. For the AUTHOR:

Pullig Library

The 16.17? P R E F A C E.

THE Author of the following pages issued, not long since, subscription papers, proposing the publishing a Collection of Vocal Music wholly original, upon a larger scale than this; but finding it inconvenient to obtain original music enough for the preproposed collection in the part of the country in which he now resides, prompted by his friends, the friends of music, he has published the following pages, and if the perusal of them give lovers of music any pleasure, he will enjoy a pleasing satisfaction. He has aimed to furnish musical societies with the rudiments of vocal music and a number of airs adapted to the capacities of youth, and also suitable for Divine Worship.

N. B. Critics in music are requested to behold errors in this work with an eye of candor, considering that imperfections in the works of a tyro are not phenomena.

Bernardston, Oct. 4, 1803.

RUDIMENTS of VOCAL MUSIC.

LESSON I. BASS GAMUT. TENOR, TREBLE and COUNTER GAMUT. LESSON II. Leading Note. When there is neither flats nor fharps placed on the letters of the Stave at the beginning of a strain, the leading note mi, is in B: But if B be depressed by a flat, mi is transposed to - - - E | If a sharp be placed on F mi is on If on F and C in If B and E to If on F, C and D in If B, E and A to If on F- C, D and G in If B. E. A and D to

NOTE. The names of the notes above mi are faw, fol, law, fol, law, twice, below law, fol, faw, law, fol, faw.

N B. An offave contains twelve femitones, five whole tones and two half ones. The five whole tones being divided amount to ten femitones, and the two natural femitones has ing added amount to twelve. The fernitones in the Major Mode are between the third and fourth, and feventh and eighth; But in the Minor Mode between the fecond and third, and fifth and fixth.

LESSON III. Musical Characters.

An Explanation of Musical Characters.

A Semibreve is the longest note used in music. A Minim is half as long as the Semibreve. A Crotchet a fourth part as long. A Quaver an eighth part. A Semiquaver a fixteenth part, and a Demisemiquaver a thirty-second part as long. Rests are characters of silence: when they are used in a tune the performer must remain silent as long as he would have been sounding their notes. The Point of Addition adds to the found of the note to which it is subjoined half of its primitive length. The Mark of Diminution reduces the notes over which it is placed to the time of two of the same specie. A Hold gives the performer liberty to found the note over which it is placed beyond its usual length. The Stur and tied notes direct the performer to sing as many notes to one syllable as the flur or tic contains. Marks of Distinction direct to perform the notes emphatically over which they are placed. A Repeat directs to perform a strain twice. A Sharp raises the note before which it is placed one twelfth of an offave. A stat depresses a note in the same proportion. A natural restores a note affected by either a slat or sharp to its primitive place. A Brace shows how many parts move together. Cliffs distinguish the parts. When the regues 1 and 2 occur at the end of a strain, the note or notes under figure 1 must be surged to the surged at a period or the end of a strain. A close is used at the conclusion of a tune. The Ledger Line is need to divide notes according to the measurement of time. A shave is five lines and their spaces on which letters or notes are slaced to shew the height or depth of sound.

C is characteristic of the first mood of common time, C with a single bar drawn across it, of the second, C inverted of the third, and 2-4 of the fourth. 3-2 of the first of triple.

3-4 of the found and 3-8 of the third, 6-4 of the first of compound and 6-8 of the second.

On BEATING TIME.

There are four heats in a har in the first mood of common time, two falling and two rising and each heat requires a second of time, heat in the following manner, first let the ends of your fingers fall, secondly the heat of your hand, thirdly shut your hand lastly throw it open. The second is beaten in the fame manner, but its movement is a third faster. The third mood of common time has two heats in a har one falling the other rising, a second of time is allowed to each heat. The fourth mood of common time has two heats in a har one falling the other rising, a second of time is allowed to each heat. The fourth mood of common time has two heats in a har in all the moods of triple time, two falling and one rising, performed in the following manner, as the end of the singers fall, ad the heel of the hand a raite.

The first mood of triple time has a pointed semibreve for its measure note, it requires a second of time to each heat. The second has a pointed uninim for its measure.

note; beaten and fung a third faster than the first. The third has a pointed crotchet for its measure note beaten and sung a third faster than the second mood of triple time. There are two beats in a bar in both moods of compound time, beaten like the third and fourth moods of common time. The first mood has a pointed semilibreve for its measure note two seconds of time are given to a bar. The second has a pointed minim for its measure note, performed a third faster than the first mood.

ACCENT.

Accent in mufic is the fwelling of the voice on the notes of a tune or fyllables of the poetry according to the rules of Profody.

N. B. See the rules of poetry in M. Perry's Dictionary.

EMPHASIS.

Emphasis is unnecessary fave in finging by word, when we must observe the same rules as in reading.

PRONUNCIATION.

In finging pronounce according to the best rules of the English language. Many who pronounce well-in speaking are apt to pronounce badly when finging on account of not placing the organs of the voice in proper positions.
